DETAILED ACTION

1. Applicant's election of Group I, claims 1-5 in the reply filed on 6/23/08 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Thus, claims 6-8 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Invention II, there being no allowable generic or linking claim. Election was made dated 6/23/08.

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

in this case it is unclear as to what being referring as "wave guide technology" (claim 1, line 2), please be more specific.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35
 U.S.C. 102 that form the basis for the rejections under this section made in this
 Office action:

Art Unit: 3729

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. The factual inquiries set forth in *Graham* **v.** *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 7. Claims 1 and 3-5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Howard S. Jones, Jr. (3611396).

Wilson discloses a product by manufacturing process for a microwave corrugated-horn antenna, characterized in that it consists in forming the corrugations of the horn 11 on the external surface of a block of synthetic foam and in then metallizing the surface of the conformed block of foam in order to form the antenna (see Fig. 1, and the discussed at col. 3-4). Further, regarding

Art Unit: 3729

the process associated by using waveguide technology. It would have been an obvious matter of design choice to choose any desired antenna forming techniques including the process by using waveguide technology as recited in claim 1, since applicant has not disclosed that these features are critical, patentably distinguishing features and it appears that the invention would perform equally well with the teaching where the forming waveguide by conventional techniques as taught by the Prior Art reference (see discussed at col. 1-4).

As applied to claims 3-5 appear to be met by the above (see Fig. 1 and the discussed at col. 2-4).

8. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Howard S. Jones, Jr. (3611396) in view of Wilson (4658258).

Howard S. Jones is in silent about limitations of claims 2-5, the Wilson discloses the hot pressing by casting and inherently discloses molding and/or casting (col. 5, lines 3-25). Therefore, it would have been obvious to one having ordinary skill in the art at the time of the invention was made to employ the Wilson teaching onto the invention of Howard S. Jones Jr. in order to form a desired antenna by using the available techniques.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Minh Trinh whose telephone number is (571) 272-4569. The examiner can normally be reached on Monday -Thursday 8:00 am to 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Vo can be reached on (571) 272-4690. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
